GLUCOSEREGULATIE  
HART- EN VAATZIEKTEN**

Tijdens dit hybride event gaan we in op de vele facetten van de cardiometabole geneeskunde, een nieuwe discipline binnen de interne geneeskunde. Meer dan ooit is de samenwerking tussen de nefroloog, de endocrinoloog, de huisarts en de cardioloog nodig om een juiste preventie en behandeling in te stellen. Misschien evolueren we wel naar de cardiometabole specialist?
